Over 30 Years of Quality Metal Fabrication

# Constable Lockers

The innovative design feature built into our Constable Locker line makes ASM the bench mark for the industry.

## Locker Specification

### Welded Body

Manufactured from 16 ga. crs prime steel all body parts are tightly fitted die-formed components spot welded and seam welded on all joints to form a strong rigid integral unit. All welds are ground smooth and buffed to allow a smooth finish.

### Door

Double pan construction consisting of a 16 ga. Crs outer panel welded at a tightly fitted 24 ga. Inner panel with no less than 8 welds resulting in a strong rigid unit attached to the body using a 16 ga continuous hinge and close on two rubber grommets.

### Shelves

Manufactured from 18 ga crs are flanged on all sides and u channel flanged on the front for extra rigidity. Can be perforated for ventilation.

### Drawers

All Drawers are manufactured from 20 ga crs, components tightly fitted and welded together to form a rigid unit. All drawers run on smooth 100lb capacity full extension ball bearing drawer slides for easy operation. All slide components are chrome plated for lasting durability.

### Handles

All handles are manufactured from extruded aluminum and finished in a clear anodized coating for lasting durability

### Powder Paint Finish

All components are cleaned and treated with a multistage iron phosphate process and coated with a high quality powder paint with a choice of no less than 16 colors.

### Bench

Built in bench is laminated maple with a all edges sanded and rounded finished with a clear durable lacquer coating.
